## Profile

I'm Ignacio Cortés, Full Stack developer with more than 5 years of experience in the technology industry. I have specialized mainly in Front End development, although I also have experience in Back End. I stand out for my proactivity, problem solving skills and commitment to self-learning. I have led innovative web projects, always looking to expand my knowledge and adapt to new technologies. I am excited to continue growing and contributing to dynamic and ambitious teams.

## Recent job experience

08/2021 – present

### Front End lead, *CrowdFarming*

- One of the technical leaders of a team of 24 frontend developers. This role involves making technical decisions to implement new features, ensuring they are scalable, efficient and aligned with product objectives. I actively promote best practices, including code reviews, the use of design patterns and agile methodologies to ensure high code quality, maintainability and sustainability. I also provide mentoring and technical support to the team, fostering professional growth, resolving technical roadblocks and collaborating cross-functionally with other teams and stakeholders.
- Optimization of the payment experience by leading the integration of Stripe and its multiple payment methods.
- Development projects using Angular and Ionic, including the creation of a microfrontend architecture to remove duplicate code between the web and mobile applications.
- Lead of the checkout process refactor, resulting in a reduction of errors by over 8%, enhancing the user experience and increasing conversion rates.
- Development and integration of key features such as Google Sign-In, which drove a 2% increase in sales and a more than 5% growth in new user registrations.

04/2020 – 08/2021

### Senior Front End developer, *Futurs*

- Development of new features using Angular and Typescript according to business requirements.
- Research and evaluation of the best tools to meet the requirements of the MVP.
- Creation and maintenance of development guidelines, documentation and best practices for the development team.

04/2019 – 02/2020

### Front End developer, *The Key Talent*

- Development of front-end solutions using Angular 8 in a Scrum work environment.
- Layout of web pages with HTML and CSS following good accessibility and usability practices.
- Implementation of APIs to connect the web application with external services and systems.
- Development of reusable components and standardization of responsive design across multiple devices and browsers to ensure a consistent and optimized user experience.

## Education

2016

Geography Degree, *Universidad Complutense de Madrid*

## Projects

2025 – present

**Tracelog**, *Event Tracking SaaS* 🔗

2025 – present

**Datataki**, *Analytics for developers (npm package)* 🔗
